TESTIMONALS

I want to thank you for facilitating such a great webinar this afternoon. The examples of how businesses are pivoting and the other ideas and tips you shared were so helpful. We ended up with about 30 people and they all stayed to the end. Says a lot. As the Director of the Center for Women & Enterprise NH, a Women's Business Center and resource partner with the Small Business Administration, I have appreciated the expertise Susu Wong and Tomo360 have shared with our clients.

Lesley Smythe

Enterprise Center, Salem State University

Susu has led many workshops for our clients over the years on multiple topics including branding and social media marketing strategy to name a couple. Each time, clients tell us they walk away with information they can apply immediately in their small business. We also appreciate working with Susu and her team at Tomo360 because it is clear they are dedicated to their community and to creating an equitable economy for all. We look forward to working with Susu and Tomo360 for many years to come!

Chandra Reber

Director, Center for Women & Enterprise

Tomo360 partnered with us to provide a series of marketing webinars targeting local storefront business owners that have been most significantly impacted by the COVID-19 pandemic. Susu shows a genuine interest in helping business owners thrive, especially during these challenging times.

She follows up with participants after workshops to discuss any questions they may have. We are thrilled to have Susu and the Tomo360 team as our marketing consultant.
